

# Experts in Providing Specialist Services Nationwide

[shieldservicesgroup.com](https://shieldservicesgroup.com)

# We are Shield Services Group

## Nationwide Experts

**Established in 1979, Shield Services Group are specialist technical contractors, working across a range of sectors all over the UK.**

Our diverse capabilities enable us to complete works for multiple aspects of construction, engineering and refurbishment projects. Additionally, we offer a comprehensive, integrated package for specialist construction works, as well as support and enabling works to complement contractors or individual services. Our expertise covers the removal and remediation of all types of licensed and non-licensed asbestos materials and the planning and execution of building demolition, soft stripping and remediation of contaminated land. When required, we can provide temporary structures and access via our licensed scaffolding division.

As both subcontractors and principal contractors, we are flexible can and can tailor our support to the needs of our customers. We design, project manage and recommend products that meet your requirements or carry out tasks to fit in with your plans.

We project manage each site, be it new or refurbishment, and create the facilities required for each site to be fully functioning and efficient, all designed to be site-specific. Projects are assigned to experienced Project Managers, who are responsible for developing cost-effective and efficient solutions while delivering the best quality of work and customer satisfaction.

Our specialist services are also tailored for the marine industry. We work within the industry safety standards to maintain and develop the vessels efficiency, whilst protecting passengers and employees.

[Our accreditations, memberships and awards are a formal recognition from industry regulatory bodies and a testimony to our focus on Health & Safety.](#)

We operate from 12 locations around the UK and employ a diverse range of personnel with varying skills and experience. Our employees include operatives, supervisors, administrators, auditors, engineers, technicians, contract managers, branch managers, account managers and divisional managing directors.

Our Board of Directors is invested in nurturing the business. We consistently improve our processes and standards, keeping us at the forefront of the industry, and our focus on our people and relationships forms the foundation and principles of the company.

The Health and Safety of our workforce is our priority, and we ensure that all employees work in accordance with the Health and Safety at Work Act 1974 (HASAWA).

# Our Services

## Asbestos Removal Services

With 12 operational branches located across England and Wales, Shield Asbestos are qualified to offer specialist local services. We operate across a broad range of sectors, including construction, retail, public health, local Government, education, housing associations, utilities and domestic.

We hold a full three-year Health and Safety Executive (HSE) licence to undertake work with asbestos and provide a wide range of asbestos removal, encapsulation and decontamination services under this license, using the latest technologies, processes and equipment to do so. We carry out rigorous internal and external auditing of our asbestos operations on site, ensuring that all safety and quality control requirements are met. All our site operatives receive full training in asbestos site work and removal techniques in line with the most up-to-date industry regulations, as well as regular medicals.

We are compliant with the Control of Asbestos Regulations 2012 (CAWR20120) and the HSE Approved Codes of Practice (ACoP) L28 and have dedicated policies and procedures to ensure a consistent level of service. Our Health & Safety and other accreditations meet industry standards and regulatory bodies, and we have achieved multiple Gold RoSPA awards.

## Surveying & Consultancy Services

We also offer Asbestos Surveying and Consultancy services across the UK.

Any man-made structure, commercial building, residential building or house constructed between 1850 and 1999 can still pose a risk to the occupants or workers who live or reside within them. UK Regulations require you to conduct asbestos surveys on buildings constructed within this period. These surveys are required if you are occupying, buying, selling or demolishing such a building. If tenants or people live inside the building, then asbestos surveys are also performed as a health and safety check.

Our asbestos surveyors are all highly skilled, undergo regular training and follow all recommended Health & Safety protocols, enabling us to safely deliver Management, Demolition, Refurbishment and Re-inspection Surveys (Condition Surveys). Our Asbestos consultants are fully qualified, with over 30 years' experience in the Asbestos and management industry.

Our asbestos surveyors are all highly skilled, undergo regular training and follow all recommended Health & Safety protocols, enabling us to safely deliver Management, Demolition, Refurbishment and Re-inspection Surveys (Condition Surveys).

# Our Services

## Scaffolding Services

Our Scaffolding services include a full project management package along with the installation of both simple and complex scaffold structures for a variety of projects that can be tailored to suit your requirements and delivered at short notice.

Our scaffolding works are entirely safety compliant and are carried out in line with our own Safety First Initiative. We also hold a license to undertake licensed asbestos-scaffolding, and our operatives can erect the structures required for the safe removal of licensed asbestos. We can also provide scaffolding to the marine industry, where our equipment and strategies have been modified to meet the challenges of confined spaces onboard vessels. Our teams can build structures while vessels are in dock or on tour.

Shield Scaffolding are award-winning full members of the National Access & Scaffolding Confederation (NASC).

## Mechanical Electrical & Facilities Services

Our Mechanical, Electrical and Facilities Services division offers a full spectrum service to keep your building running efficiently, performing sustainably and looking fantastic, whatever your sector.

Our services include everything from the initial design stage to installation and handover. As a part of our facilities management offering, we provide planned preventative and reactive mobile and site-based mechanical and electrical engineering services, as well as small works.

If you are considering outsourcing your building services or wish to review your existing FM provider, rest assured that Shield will provide you with the highest levels of service nationwide.

We can help you bring your buildings to life and keep them performing as designed. Our vision and enthusiasm for building services engineering allow us to develop and maintain quality engineered solutions for the modern built environment.

Our experience includes working in various sectors such as Commercial, Defence, Education, Healthcare and listed building refurbishment, where we can deliver technically challenging projects requiring digital design, simulation and 3D Building modelling.

# Our Services

## Fire & Security Services

Our Fire & Security services include the design, installation and maintenance of Fire Systems, Access Control Systems, CCTV and Intruder Alarms, keeping your property safe and secure.

We offer top of the range and both traditional and more technologically advanced security systems to prevent theft, damage and assist in property protection. All our systems can be integrated with pre-existing infrastructures. We can also provide an end-to-end service, including design and installation.

We are fully certified, insured, approved and accredited by the industry-wide governing bodies BAFE (British Approval for Fire Equipment) and SSAIB (Security Systems and Alarms Inspection Board), with all of our installations and paperwork being audited regularly.

Our standards meet with the EN45011 Product Certification Body and EN45012 as a Quality Management System Certification Body, and are approved by the UK's Accreditation Service (UKAS) for the installation and maintenance of Intruder

## Insulation Services

Shield has a 40-year-old history supplying and installing quality insulation products across the country.

Our extensive expertise enables us to provide a more tailored solution to your project alongside a comprehensive end-to-end management service. This includes recommending bespoke and appropriate insulation, advice and guidance. Alternatively, we can also provide products for pre-determined specifications.

Our service offering includes thermal fire protection, fabrication and the fitting of bespoke ductwork for ventilation systems, trace heating systems for the efficient regulation of water temperature within the pipework, core insulations, insulation protection and cladding systems.

Our Thermal Insulation Engineers are highly qualified, holding CSCS cards and also receive insulation-specific training such as BS5422 installation.

Our clients range from small one-man operations to internationally recognised corporations, crossing both public and private sectors across the country.

# Marine Services

## Marine Services

We offer a turn-key solution to support your project, whether a cabin refurbishment, resin deck repair or fire & thermal insulation.

Our experienced team deliver innovative solutions compliant with international maritime regulations. We can ensure your project's best possible service delivery with professional project management and site teams, alongside long-standing supply chain and marine partners.

We pride ourselves on building solid relationships with our customers and working with you to understand your requirements better.

Our capability to produce high-quality, multi-trade package contracts is based upon our professional competence, aligned with a fast-paced, creative strategy.

Shield Marine offers specialist marine services, both nationally and internationally, upgrading exteriors and interiors of vessels, including offshore works, sea-going ships, and marine vessels. We can supply complete contract management, engineering, hot lay-up maintenance, and hazardous surveys. We also offer riding squads for emergent works when required.

# Health and Safety

Shield Services Group operate to the Board's exceptionally high standards in everything we do. Our approach to Health and Safety is no exception, as borne out by our motto, 'Health and Safety beyond compliance'. We empower our workforce and ensure they have the best knowledge, training, skills, experience and authority to identify, control and manage any foreseeable risk that might arise. This makes for a healthy and safe environment for anyone that may be affected by our work activities. We are a company that constantly challenges the status quo and promotes a positive dynamic Health and Safety culture across all divisions.

We have an industry-leading, large SHEQ team of competent, experienced professionals who monitor and review our operations daily to ensure our exceptionally high standards are maintained and identify any opportunities for learning and improvement. All undesired or unplanned events are thoroughly investigated, with root causes identified and addressed promptly.

Our in-house training department employs industry-respected, experienced trainers who deliver courses above and beyond the industry standards both internally and externally.

## “Health and Safety beyond compliance”

# Health and Safety

Our awards & accreditations are a testament to our team's hard work and commitment.

At Shield we strive for the very best standards in all aspects of our business. Our management system certifications confirm that we operate at the highest levels. We have successfully operated ISO 9001 (quality), 14001 (environmental), and 45001 (previously 18001, health and safety) certifications for many years.

Health and safety is paramount across all our divisions, demonstrated by the ROSPA Gold awards we have won.
